

BAY OF PLENTY REGIONAL COUNCIL

BAY OF PLENTY POST WEATHER EVENT IMAGERY

VOLUME: PRJ50634_01

PROJECT SUMMARY

Bay of Plenty RC contracted Woolpert to capture and process imagery to support landslide identification in the Region following the upper North Island weather event in January 2026.

Capture was undertaken between the 15th – 31st March 2026.

This survey was planned to achieve imagery with a GSD of 10cm and spatial accuracy +/- 0.5m @ 95% confidence. Primary product was four band (RGBI) orthorectified imagery, and natural colour (RGB) tiles have also been supplied.

DATA SUMMARY

This volume includes the following data in NZTM2000 projection:

- 2,717 x 1:1000 NZTopo50 tiles
- 10cm RGB/RGBI Orthophotos in GeoTIFF/TFW – 1:1000 NZTopo50 tiles
- 10cm RGB/RGBI Orthophotos in ECW/EWW – 1:1000 NZTopo50 tiles
- Ancillary files in ESRI Shapefile format: Tile Index, Extent, Seam Lines
- File listing in text file format
- Metadata file: This document in PDF format

CONTENTS

1. Data Information	4

2. METADATA

Source Data	Source	Description	Ref No	Date
Imagery	Woolpert	Leica DMCIII - 523	FL034857	15/03/2026
			FL034886	17/03/2026
			FL034929	20/03/2026
			FL035111	31/03/2026
GPS Base Data	GeoNET /LINZ	GeoNET CORS, LINZ GDB co-ordinates	As above	As above
Control	Existing Datasets	RTK GNSS	PRJ48327	various

Capture Conditions	Description
Sun Angle	> 30 degrees
Tidal constraints	Nil
Cloud / Shadow	Captured under clear sky, (noting some shadow acceptable beyond the study areas)

Ortho Characteristics	Description
Format	GeoTIFF & ECW
Ground Sample Distance	10cm
Terrain Model	Existing Bay of Plenty LiDAR
Tile size	480m x 720m (NZ Topo 50, 1:1000 tiles)
Sample Type	8-bit Integer
Image Bands	RGBI & RGB
Orientation/AT	Aero-triangulation Block Adjustment
No data value	255

Reference Systems	Horizontal	Vertical
Datum	NZGD2000	NZVD2016
Projection	NZTM2000	N/A
Geoid Model	N/A	NZGeoid2016

Accuracy Specification	Measured Point	Derived Point	Basis of Estimation
Ortho Pixels	0.5m		Project design
Terrain data		0.2	Reported accuracy

Notes On Expected Accuracy

- Values shown represent 95% confidence level, in metres.
- “Derived points” are those interpolated from a terrain model.
- “Measured points” are those observed directly.

Data Validation – Orthophoto Image

- This data has not been field tested for accuracy. Comparison of the orthophoto with points which were also used in the photo orientation process resulted in a horizontal standard error (RMS) 0.136m, or **0.3m at 95% confidence**. Full proof of accuracy achieved requires comparison to independent test points.

Required Accuracy (95%)	0.500m
RMS_X	0.102m
RMS_Y	0.090m
RMS_Positional_XY	0.136m
XY Position @95% confidence	0.268m
Number of Points	19
Type of GCP	Existing features

Items to Note

There are some partial tiles in the northern part of this project. Weather prevented full capture in this area within the capture window - therefore we have provided the full coverage available.

3. CONDITIONS OF SUPPLY

The data in this volume has been commissioned by **BAY OF PLENTY REGIONAL COUNCIL (BOPRC)**

This metadata file (README_PRJ50634_01.PDF) contains important project information and should always be stored with the Woolpert supplied deliverables contained within this volume.

The data in this volume is provided by Woolpert NZ Ltd (Woolpert) to **BAY OF PLENTY REGIONAL COUNCIL** under the client's Terms of Engagement **CON002037 BOPRC Contract for Services - Landslide Aerial Imagery Capture**, which require **BOPRC** to assume beneficial ownership, subject to the following conditions:

- all copyright and other intellectual property rights ("Rights") in the products be transferred to the **BOPRC** upon payment of all amounts payable to the Woolpert under this contract.
- Woolpert shall retain all Intellectual Property rights in and to, and ownership of raw data collected by in performing these Services.
- **BOPRC** and its partners may release the delivered data and reports under Creative Commons Attribution 4.0 International, as per the New Zealand Government Open Access and Licensing (NZGOAL) framework New Zealand.
- The data is not used for purposes beyond that explicitly agreed in the description of the Services provided by Woolpert NZ Ltd.

This data is provided in accordance with the specifications agreed with **BAY OF PLENTY REGIONAL COUNCIL**.

Any problems associated with the information in the data files contained in this volume should be reported to:
